SUMMARY

Full-stack software engineer and AI builder with hands-on experience shipping production systems at a Fortune 500 company, building agentic AI applications, and developing web platforms end-to-end. Proven ability to move fast across the stack - from React frontends and REST APIs to Python pipelines and LLM integrations - with a track record of measurable impact and award-winning project work.

EDUCATION

University of Louisiana at Monroe

Aug 2023 - May 2027

Bachelor of Science, Computer Science

• **Achievements:** Minor : Business

EXPERIENCE

Xerox

Jun 2026 - Present

AI Intern

Remote

- Built and deployed an AI agent integrated across Microsoft 365 to automate internal reporting and document processing for senior leadership at a Fortune 500 company.
- Engineered a full-stack volunteer management system using Power Apps, Power Automate, and Dataverse, replacing a \$95K/year platform and serving 40,000+ employees globally.

Design Arts Seminars, Inc.

Jan 2026 - May 2026

Technology & UX Insights Intern

Remote

- Built REST API integrations using Python and JavaScript with object-oriented design principles, delivering scalable automation workflows and reducing development cycles by 25%.
- Evaluated and critically reviewed AI-generated code using Claude Code, GitHub Copilot, and Cursor daily; documented findings to improve engineering team output quality.

ULM Information Technology

May 2024 - Present

Software Engineer Intern

Monroe, LA

- Developed full-stack features for university web platforms using Java, JavaScript, and HTML/CSS, applying algorithms and data structures to reduce submission errors by 35%.
- Built Python and SQL data pipelines to process and migrate 10,000+ legacy records, improving query performance by 15%.

PROJECTS

Dristi

2025

- Co-built a voice-controlled AI application achieving 99% uptime with low-latency real-time inference; validated with real users at a blind care center, reducing task completion time by 40%.
- Won 2nd Place at ULM Hawkathon (30+ teams) and 3rd Place at Nexus Technology Cup (70 teams statewide).

SATHI

2024

- Architected a full-stack agentic career assistant with React frontend and Python-backed services, integrating prompt engineering and RAG pipelines to deliver personalized recommendations at scale.
- Built a multi-source job aggregation engine using Adzuna and Himalayas APIs with custom match-score logic across the full software development lifecycle.

Athlyze

2024

- Built a full-stack sports analytics web application with React frontend and Firebase backend, delivering intuitive data visualizations and a seamless user experience across mobile and web.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java, SQL, C++, HTML/CSS
- **Frameworks & Libraries:** React, Next.js, Flask, Firebase, PostgreSQL, REST API Design
- **AI & Dev Tools:** Claude Code, GitHub Copilot, Cursor, Gemini, Prompt Engineering, Agentic Workflows
- **Developer Tools:** Git, AWS, CI/CD, Agile, Automated Testing

ACHIEVEMENTS & LEADERSHIP

- President, Girls Who Code | Treasurer, NSA
- Campus Ambassador, Intern Insider
- 2nd Place – ULM Hawkathon 2025
- 3rd Place – Nexus Technology Cup 2025 (70 teams statewide)

CERTIFICATION

- AWS AI Practitioner
- AWS Cloud Practitioner
- CodePath AI Engineer Program
